

BLUE

protect + perform

ENHANCING FERTILIZER EFFICIENCY

BLUE is an ammoniated, homogeneous granular fertilizer formulated with patented ingredients, and a comprehensive micronutrient package, improving fertilizer efficiency and enhancing crop performance, profitability and sustainability.

BLUE features a combination of a large organic carbon molecule and a special microalgae extract that improves soil around plant roots and can be used as singular source for all necessary nutrients, or as a part of a blend to reap the benefits of enhanced fertilizer efficiency across every acre.

STEP 1

Primary, Micro & Macro Nutrients

STEP 2

Ammoniated Blending

STEP 3

Homogeneous Granule

FORMULATION	N	P ₂ O ₅	K ₂ O	Ca	Mg	S	B	Cl	Co	Cu	Fe	Mn	Mo	Ni	Na	Zn

TARGET USE:

Pre-Plant Blends

Easy to Use

For All Crops

Available in customizable
NPK grades.

BLUE HAS NATURAL CARBON-BASED EXTRACTS PROVEN TO:

- ✓ Reduce phosphorus runoff and tie-up with antagonistic soil nutrients
- ✓ Improve plant nitrogen uptake and reduce nitrate leaching
- ✓ Increase potassium availability in heavy clay soils that can "trap" potassium
- ✓ Improve soil health by feeding beneficial soil micro-organisms
